The Self Shelf is built on simple structural elements inserted into pre-prepared CNC milled parts. The basic supporting element is a vertical rectangular plate. It keeps the strength of the entire object and carries the individual shelves. We wanted to create furniture which can be user-friendly and stable enough. Our goal was to design a dynamic and at the same time space-saving object in your home. The special surface treatment with authentic colour is possible to choose on request.

Self Shelf / ideal for books or special pieces, 2020, hand — stained plywood

Plody studio is focused on bespoke furniture and interiors.
